We don't believe that confronting & migrating through the complexities of genetic disorders needs to be overwhelming, confusing, and costly.

Virtual Medical Practice focuses on the diagnosis and management of children and adults with rare disorders utilizing state of the art technology and years of experience. With simple and cost effective technology, we provide excellence in specialized care to patients in often underserved areas. Patients with these complex disorders can rest assured there is always help close by.

Dr. Fran Kendall, CEO and founder of Virtual Medical Practice, is a recognized leader in rare genetic disorders. She is a Harvard trained Geneticist with a background in Pediatrics who has dedicated over 20 years to the compassionate clinical diagnosis and care of

those with a wide array of inborn errors of metabolism and other genetic disorders. Dr. Kendall, who was a co-founder of a successful biotech company and founded the Mitochondrial Disorders Program at Boston Children's Hospital, has a specific interest in mitochondrial disorders and is one of only a handful of renowned experts in this specialized area of genetic medicine. She has published numerous articles, has been involved with a number of charities, and is an often requested presenter on rare genetic diseases.
